for the past year

The Agricultural operations during the year, and also, may

KANSAS CITY
KANSAS

be briefly stated as follows:

The best estimate, that can be made, of the area of cultivated lands, might be ^{stated} ~~estimated~~ up at 340 acres. The products are chiefly corn, oats, wheat, beans, Peas &c. of vegetables, Potatoes Turnips, Sweet Potatoes, ^{Pumpkins} with the usual varieties of garden products. The aggregate amount of the cereals raised last year is difficult to arrive at, but largely on the increase from the previous year. The same may be said of live stock. There are horned cattle, horses, mules and swine. Some attention is being paid to the improvement of the breeds by the introduction of a higher grade of stock. There will be, in this year, an increase of nearly double the amount of cultivated land from last year, adverse and unfavorable as has been this spring to active spring work. (There is fenced 160 acres fenced in, and being now in the course of breaking up as a Mission farm, mostly at the expense of the Wyandotts. 3 mowing Machines, one Corn sheller ~~Mowing~~ Corn sheller one The Improved Plow & 160 in N other farming implements
